

BIO Biological Sciences

Colloquium

- ✓ Time | On Thursdays / 4:00 PM
- ✓ Place | Offline : #110-N104

Date	Speaker	Title
09.07	Staci Jakyong KIM University of Tsukuba	Regulation of sleep homeostasis in distinct neuronal population by kinase signaling pathway
09.21	Seunghee Hong Yonsei University	Unravelling atopic dermatitis and psoriasis using single cell RNAseq
10.05	Daesik Kim Sungkyunkwan University	CRISPR/Cas9-mediated precise genome editing
10.12	Hyeonwoo Kim KAIST	Decoding Exercise at Molecular Levels and Health
11.02	Sukwon Jin GIST	BMP signaling in vascular development and homeostasis
11.09	Ji Hyeon Ju The Catholic University of Korea	TBA
11.16	Eun-Mi Hur Seoul National University	Role of tubulin posttranslational modifications in neurodegeneration
11.23	Hyun Woo PARK Yonsei University	Anchorage Plasticity Reconstructs the Metastatic Cascade
11.30	Hyung Jin Choi Seoul National University	Food-seeking control by hypothalamus and nucleus accumbens circuit in rodents and primates
