

BME Colloquium

Department of
Biomedical Engineering

Time | On Tuesdays / 4:00 PM

Place | Bldg.110 Room N104

Date	Speaker	Title
03.19	Hyunsook Lee Seoul National University	Loss of telomeric G-quadruplex dynamicity induces phase separation at the telomeres
03.26	Jaehyun Jeong Soongsil University	TBA
04.02	Hyeyoung Shin Seoul National University	Towards computational, algorithmic and implementation level understanding of perceptual inference
04.09	Youbong Hyun Seoul National University	Decoding the Secret Life of Violet: Innovations in Plant Water Use and Applications
04.23	Jaekyung Kim KAIST	Roles of sleep oscillations in motor memory consolidation
04.30	Jeongmin Kim Seoul National University	Single molecule microscopy for tissues and intact small animals
05.14	Woojung Shin KAIST	Employing engineering principles to investigate host-microbiome crosstalk
05.21	Inwha Baek Kyunghee University	Epigenetic regulation of transcription activation and initiation
05.28	Kyung Lee NCI, NIH	Self-organizing properties of the centrosome: What have we learned and what can we make of it after all?
06.04	Joon-Yong An Korea University	Whole Genome Sequencing Analysis Identifies Genetic Architecture underlying Female Protective Effect in Autism
